Planning Department

The 2000 Census Report

Providing a FIRST CHOICE community through excellence in public service

Prepared By The Chesterfield County Planning Department
P.O. Box 40, Chesterfield, Virginia 23832

(804) 748-1050
www.chesterfield.gov/plan

April 2003

For More Information

The data in this report represents only a small portion of all the census data available from various sources. Many of the tables show summarized data. For example, Table A has five age groups. These groups were created from data with 23 different age groups. Much of the data shown can also be sorted by age, race or ethnicity.

Data on marital status, disability, ancestry, citizenship, veteran status, and availability of telephone service and plumbing or kitchen facilities, although not in this report, is also available.

To obtain additional information, you may contact the Chesterfield County Planning at (804) 748-1075 or visit our Web site at chesterfield.gov/plan

To research both local and Virginia U.S. Census data, contact the Weldon Cooper Center for Public Service (434) 982-5522 or at virginia.edu/coopercenter/vastat/

Data from the U.S. Census for all areas of the country can be accessed from the Bureau of Census Web page at census.gov

INTRODUCTION

The growth of Chesterfield County in the last 20 years has altered more than the physical landscape; it has significantly changed the demographic, social and economic character of our population. It is important to understand these changes, because with them comes trends that will guide the course of the county's future.

The purpose of this report is to provide detailed information about Chesterfield County from the 2000 U.S. Census of Population and Housing, the most comprehensive source of information about our demographic, social and economic character. The United States Census, taken every 10 years, provides vital data for not only the whole county, but also for 59 census tract areas, information that was released by the Census Bureau in the summer of 2002. Contained in this report is extensive data on some of the county's most important characteristics for each tract. A brief overview of some of the major trends occurring in the county is also presented. Also provided is comparative countywide data for the years 1980, 1990 and 2000.

The data provided here can help answer such questions as:

- What parts of Chesterfield County have the most population?
- How many persons in different parts of the county are employed in Chesterfield County?
- How many Census tracts have a median household income over \$80,000?
- What is the median value of owner-occupied housing in census tract 1008.04?
- Which census tract has the most workers employed in the manufacturing sector?
- How many households in the county are in poverty, and what are their general locations?

Using This Report

The map on the following page shows the identifying number for each Chesterfield County census tract. These numbers are keyed to the corresponding census data for each tract found in the summary tables. Most of the data found in this report is extracted from the U.S. Census Bureau's Summary File 3 (SF-3). This data is based on a sample of about 17 percent of all households, and is, therefore, subject to sampling variability. Tables A, B, F, G and L contain data extracted from Summary File 1a (SF-1A). This information is based on the complete count of population and housing and is, therefore, not subject to sampling variability. An explanation of U.S. Census terms and abbreviations used in this report is included on page 46.

Major Trends

Five significant demographic changes occurred from 1990 to 2000. Some of these were continuations of trends that occurred from 1980 to 1990.

Aging Population: From 1990 to 2000, the median age in Chesterfield increased from 31.9 to 35.7. The number of people in their 50s almost doubled. The number of children (under 10 years old) only increased by 10 percent, while the entire county population increased by 24 percent. See p4

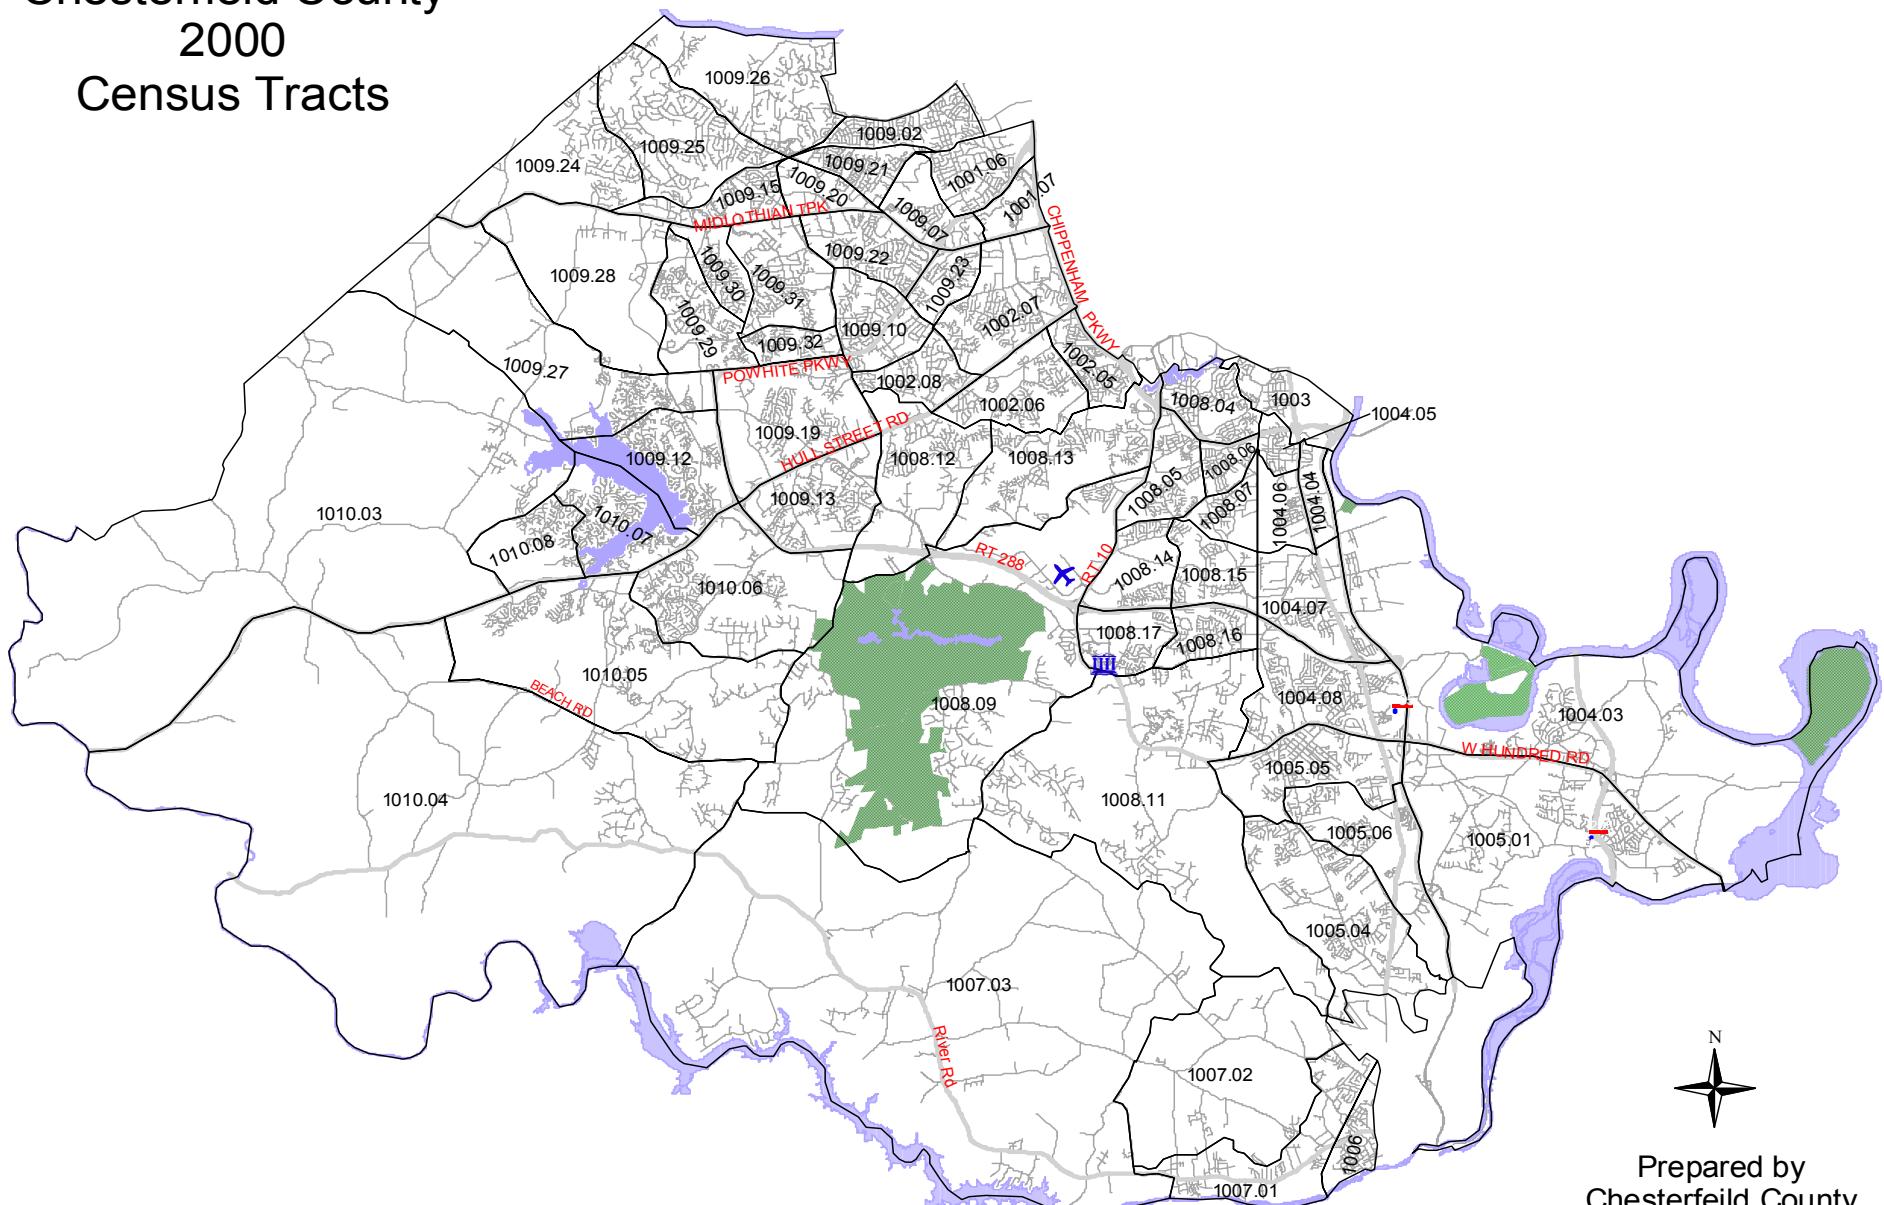

Smaller Households: The number of households without children has now increased to 52,895 (34.7 percent) while those with children grew to 40,877, a 19.6 percent increase. Many of these households without children are single people living alone, but most are "empty nesters". See p16

Population Shifts: Eight census tracts showed decreases in population. Two areas (the northwest and the Spring Run/Woodlake areas) had large population increases, which accounted for almost half of all the county's population growth. See p42

Higher Housing Rent: The median rent for apartments and single-family houses increased by 60 percent to \$717 per month. Inflation during that same period was 33 percent. See p 26

Growth in Hispanic Population: Following national trends, the Hispanic population more than tripled from 1990 to 2000, reaching 7,617. Although this was a significant increase, the Hispanic population is less than 3 percent of the total county population. See p6

Census Terms and Abbreviations Defined

Census Tracts: Small geographic areas created for statistical reporting. They have stable boundaries and do not cross any county lines. Chesterfield County has 59 census tracts, seven more than for 1990.

Ethnicity: Usually refers to whether a person classifies him or herself as Hispanic . Hispanic people can be of any race.

Family: Two or more persons living together and related by birth, marriage or adoption.

Household: Consists of all the people who live together in a single dwelling unit, regardless of their relationship. Households include single people living alone, families and many other living arrangements.

Income: Reported for the year 1999, not 2000, because 2000 had not ended at the time of the census taking (April 1, 1990).

Multi-Race: For the first time the Bureau of the Census allowed people to indicate that they were more than one race.

Unemployment: This category includes only people who are actively looking for work. Those no longer looking for work are not in the labor force.

NOTE ON EMPLOYMENT SECTORS: Most employment establishments can be divided into 10 standard sectors. These sectors are indexed by the North American Industry Classification System Codes (NAICS) This system replaced the SIC code system after the passage of North American Free Trade Agreement.

Employment abbreviations used in Table Q are as follows:

Agg/For/Fish/Mine: Agricultural, Forestry, Fishing and Mining establishments.

T W U: Transportation, Wharehousing, and Utilities establishments.

F I R E: Finance, Insurance, and Real Estate Establishments.
